Editor:

Once the authors resubmit the revision, please submit it in doc. or docx file, not in the PDF format.

---

Reviewer A:

Please provide unstructured abstract for a perspective paper.

The authors provide a very good perspective article. Just one point, the title is a journey of family caregivers in Indonesia. I was thinking the authors will provide the info how the journey of the family caregivers for 10 years or 20 years back until today. How the concept of family caregivers is evolved from time to time. But the authors mostly focus on ethical dilemmas or issues among the caregivers. So, my suggestion is just to remove "journey" word. Maybe using another title such as "Common ethical dilemmas among family caregivers in Indonesia" or something like this.

---

Reviewer B:

Recheck the citation and reference format carefully. Some typos and errors! Checking the lower case, upper case, no abbreviation for journal names, and use consistent doi format. And some typos for English writing were identified.

I want to see the real implication of this study for nursing practice, especially for family nursing or community nursing. Perhaps, the authors could add one subheading "Implication for nursing practice" before conclusion part.

Overall, it is a good paper. I will accept the article after minor revision.

Martina Sinta Kristanti,

We have now copyedited your submission for Belitung Nursing Journal. Please download the file in the attachment and provide the corrections to us within 3 working days.

Specifically:

1) Provide ORCID iD of each author.

2) Provide short author biographies of each author as well as academic title.

3) Provide missing references for British Medical Association (2007) and Gillon (1994).

4) There are three authors in this study. When the author mention "I would start", and "when I started my PhD study", does it describe which author? Please provide initial.

5) "K and CE provided feedback on the manuscript draft" – cannot be named as an author according to ICMJE

(<http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html>).

Please check very carefully. You can put both names in the acknowledgment.

The ICMJE recommends that authorship be based on the following 4 criteria:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

This is the last opportunity that you have to make substantial changes. You will be asked at a later stage to proofread the galleys, but at that point only minor typographical and layout errors can be corrected.

If you are unable to undertake this work at this time or have any questions, please contact me. Thank you for your contribution to this journal.

Sincerely,
