Reviews

Review 1	
Overall evaluation	Paper 6:
	Relevance 5
	Contribution to academic debate 4
	Structure of the paper 4
	Standard of English 4
	Title, abstract, and keywords 5
	Research/ study method 4

	Clarity 4
	Discussion and conclusions 5
	References 4
	Overall evaluation 3
	Reviewer's confidence 4
	The paper only contains some errors in English expression, thus needs to be improved in order to meet standard academic English writing.
	Some comments:
	1. Are there more recent studies in the field?
	2. How the spatial and temporal sensitivity studies are explained in the simulations?
	3. How the numerical results are compared with experimentation?

Review 2	
Overall evaluation	1. The title of figure 9 and 10 is identical with figure 8. please adjust to the figure legend. 2. The Nu number RWPs is the highest value, why the temperature outlet is lower than Plain FTHE. (The information showed in figure 10). 3. The heat transfer always occurred in viscous sub-layer, please indicate the value of y^+ on the simulation results.

Dear distinguished authors,

It has been a while since we met at the conference. I want to provide an update about the progress of our conference's publication. In the mid of February we received information that Matec Web of Conferences is no longer indexed in Scopus. We tried to solve the problems with the publisher, EDP Sciences. The publisher makes appeal to Scopus. While they try to solve the problem with Scopus, the EDP Sciences gives us the permission to switch to another conference proceeding under the same publisher that is indexed in Scopus, the E3S Web of Conferences. The editorial team is making a great effort to publish the proceeding by this coming April.

Thank you for your kindest assistance and cooperation.

Best wishes,

Dr. Didik Wahjudi, M.Sc., M.Eng.

Associate Professor

Mechanical Engineering Department

Petra Christian University

Dear Dr. Made,

As per today the manuscript is in the final editing process. The editorial team has asked some authors to revise some paper but the responses of some authors are very late. Hopefully, the proceedings can be finished soon. Should you need any formal letter from us, please let me know. Thank you for your suggestion to update the conference website. We will update the information on the website.

I am sorry for the inconvenience.

Best wishes,

Didik Wahjudi

Dear Dr. I Made Wicaksana Ekaputra,

Thank you for asking for the progress of our proceeding. First, I want to apologize for the delay. Our editorial team is in the final process of editing the proceeding. I am really sorry that some authors do not respond immediately. The biggest challenge is to make sure that there are at least 50% of foreign authors in the proceeding. This requirement was just given by the publisher. Finally, the editorial team has succeeded to fulfill this requirement. I expect the proceeding can be published some time in September.

Thank you so much for your support and cooperation.

Best regards,

Dr. Didik Wahjudi, M.Sc., M.Eng.
