Editor and Reviewer comments:

Reviewer #1:

1. The abstract has not discussed the research objectives and results, so readers do not understand this Proceeding.
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review has not explained the theories that are related and relevant to the research object and are well related to the study results.
4. The focus of this research can be developed for further study, both in Indonesia and abroad, because the research topic is very relevant to the novelty of other research.
5. References are good enough, but we still need to find the latest references so that this research becomes more up-to-date.

I hope you can make improvements as soon as possible and send the revised article again via this email.
