Dear Editor

I have read and used scientific articles published in ITALIENISCH Journal.

The performance of the ITALIENISCH Journal was excellent, and the published article helped me conduct research and write scientific reports.

I have completed a scientific article entitled "**Optimization of Assistance of Students in Thesis Writing with Theory of Planned Behavior Framework.**"

I hope this article can be published in the ITALIENISCH Journal because exciting findings in the scientific report can become new treasures in science, especially in education sciences.

I am willing to go through the review process following ITALIENISCH Journal standards.

Editor and Reviewer comments:

Reviewer #1:

1. The paper's focus is more applicable to Indonesia Only. How about other countries and the questionnaire?
2. There should be more information about the object of research, not about the content of the study.
3. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
4. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire, which put the conclusions in question.
5. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and, therefore, the conclusions.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Carolus Borromeus Mulyatno
Universitas Sanata Dharma, Yogyakarta, Indonesia

Thank you for your efforts to make improvements to your article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. It might be publishable if the author could work with a robust English language editor or colleague to clean up both language and argument.
2. A side note is that it's not clear what title references the article.
3. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
4. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
5. When study design comes into play, there are serious questions about the system.

Articles that have been revised and please send them back via this email.
