Dear editor,

I send you the article **revised**. Regarding some notes in the bibliography that ask for the addition of initials, I would like explain that in the multi-ethnic Indonesian tradition, there are some tribes that only have names without family names. So, there are some names that only contain one word or one name so that there are no initials. Hope this explanation helps the editor to understand our situation. I send you an example of an author without family name, this article is also cited in my paper.

Best regards and thank you

Carolus
