Editor and Reviewer comments:

Reviewer #1:

1. The paper's focus is more apply on Indonesia Only, how about other countries and the questionnaire.
2. There should be more information about the object of research, not about the content of the study.
3. The English in parts approaches being incomprehensible so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
4. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire which put the conclusions in question.
5. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and therefore, the conclusions.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Kepada: Carolus Borromeus Mulyatno &lt;carlomul@gmail.com&gt;

Dear

Carolus Borromeus Mulyatno

Universitas Sanata Dharma, Yogyakarta, Indonesia

Thank you for your efforts to make improvements to your article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. If the author could work with a robust English language editor or colleague to clean up both language and argument, it might be publishable.
2. A side note is that it's not at all clear what the title references the article.
3. The literature review includes some tantalizing references, but even after sorting through the language issues, the links are not made to the specific study.
4. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
5. They when study design comes into play there are serious questions about the system.

Articles that have been revised and please send it back via this email.
